Company Reference

Loan Compliance Challenge

Profiles for the 100 companies referenced in loans.csv. Each profile states the company's headquarters country, industry, the assets it can pledge against a loan with their current value, and related entities that may appear as the recorded owner of a pledged asset.

This document is the reference material your retrieval agent should search. It does not state currencies directly — deriving the correct reporting currency for a country is part of the task.

Index

ID	Company	HQ Country
